Dose It Look like Real Oak ?

Thanks to our ability of innovation and R&D.

How Linclastn Door

Are Best In Class, Superior In durability & Performance ?

20+ Years' Experience

Quality First

No best, but always do better. This is the core concept of quality that Linclastn Doors stands for.

Polyurethane foam core

Environmentally Friendly CFC Free Polyurethane Injection Foam Core provides outstanding insulation for sound and thermal.

GRP door skins

High Impact Compression Molded Skins with Wood Grain or Smooth Surfaces.

Full length composite stiles

Our full-length composite stiles protect the door from external moisture to prevent warping or rotting.

Decorative glass

Triple glazed and laminated as standard 24mm glass units for extra security and peace of mind.

WEATHER RESISTANT

GRP front doors are incredibly strong and durable. Resisting warping, dents and rot, these doors will not absorb moisture to provide long-lasting beauty and performance.

LOW MAINTENANCE

Our GRP doors may well perform in extreme weather, ensuring that upkeep is easy and minimal while performance is absolutely dependable.

Contemporary Range

A truly clean and minimalist design with sleek and modern crafts.

Linclastn contemporary GRP doors make us feel warm and delicate...

Traditional Range

Traditional style GRP doors featured with conventional OAK woodgrain finish, but performance is indeed times of wooden doors.

It's really a perfect combination of tradition and modernity.

Cottage Range

Cottage style GRP doors are designed with six-panel and classic rich OAK grain texture, presenting us historical door style,

as well as updated interpretations of the historic designs.
